PROFESSIONAL SUMMARY

Web Design & Development student at Northern Virginia Community College with hands-on experience building full-stack and interactive web applications using JavaScript, Node.js, Express, MongoDB, and Three.js. Combines project-based technical troubleshooting with strong customer service and communication skills developed through direct customer-facing work. Seeking an entry-level IT Support, Help Desk, or Junior Developer position.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frameworks & Libraries: Node.js, Express.js, Three.js, GSAP

Tools & Platforms: Git, GitHub, Vite, MongoDB, Netlify, VS Code, Microsoft 365

Core Skills: Technical Troubleshooting, Debugging, Customer Service, Problem Solving, Documentation

PROJECTS

IT Help Desk Ticket Management System

Full-Stack Web App • GitHub

- Built a full-stack ticket management system using Express.js and MongoDB, handling ticket creation, status tracking, and data persistence through a RESTful API.
- Diagnosed and resolved production bugs across the stack, including field-name mismatches between frontend and backend, incomplete database schema definitions, and CSS class inconsistencies breaking the UI.
- Structured the database schema and API routes from scratch to support real-world help desk ticket workflows.

3D Interactive IT Help Desk Portfolio

Three.js / Vite / GSAP • Live Site

- Designed and built an interactive 3D portfolio site with a Windows XP-themed aesthetic, featuring a navigable 3D office scene, camera-zoom interactions, and animated UI overlays using Three.js and GSAP.
- Debugged production issues including ES module load-order crashes, a zoom-state bug that permanently hid UI elements, and a Git binary file corruption issue (traced to core.autocrlf) resolved with a custom .gitattributes configuration.
- Deployed and maintain the site on Netlify with ongoing performance and accessibility improvements.

EXPERIENCE

Home Depot — Cashier

April 2022 – Present

- Diagnosed and resolved customer issues in real time, often under time pressure, while maintaining accuracy across cash, credit, and return transactions.
- Assisted 100+ customers per shift, providing clear, professional communication in a fast-paced environment.
- Collaborated with team members to troubleshoot operational issues and maintain efficient daily store operations.

EDUCATION

Northern Virginia Community College (NOVA)

Expected Graduation: May 2027

A.A.S. in Web Design & Development
